

Businesses worldwide, in every industry, are switching to LED lighting in their facilities. These LED lighting projects provide the perfect opportunity to maximize savings through improved lighting controls. With our strategic partnerships and turnkey solutions, FSG is your single-source provider of Smart Lighting Solutions. The future of energy management is connected lighting, building automation, and analytics. These innovations allow key personnel to see their building's energy usage and have full control of their energy consumption.

Business Insights

The importance of understanding your building's operations cannot be understated; your bottom line is directly impacted by inefficiency. Smart systems are transforming businesses all over the world and providing insight into their business operations. FSG has the solutions to improve your business by providing insights that reduce operating costs. Our team can put together a system uniquely tailored to fit your business' needs.

- Energy Reduction
- HVAC Management
- Maintenance Reporting
- Internet of Things (IoT) Applications
- Building Security
- Data Monitoring & Analytics

The right smart lighting solution gives you optimal light levels, increased savings, and improves your bottom line. FSG has the knowledge and experience to help your facility achieve maximum operational efficiency.

Products & Solutions

Our strategic partnerships with top manufacturers allow us to provide you with the right technology to solve your biggest challenges. We are not bound to any one manufacturer so you will get the product that best fits your specific situation every time.

Our Smart Lighting Solutions include:

- Daylight Harvesting
- Occupancy and Vacancy Sensors
- Dimming Controls
- Energy Monitoring
- Reporting Analytics
- Start-up and Commissioning
- Building Automation
- Code Compliance

Turnkey Solutions

FSG has the solutions to fit your business's needs. We offer comprehensive, turnkey solutions beginning with design and cost modeling, followed by system implementation, and continuing with outstanding customer care, including both preventative and on-call maintenance.

For more than thirty-five years, our team of experienced professionals has been designing, fabricating, installing, maintaining, and servicing turnkey solutions for customers in a wide variety of industries. Our team will find the perfect solution for you, manage your project from start to finish, and allow you to stay focused on running your business.
