

TD BANK

Multiple Locations

When TD Bank wanted to capitalize on the benefits of LED Lighting in their branches, they turned to FSG to help identify the right products and solutions to get the job done.

CHALLENGE

TD Bank wanted to upgrade their existing lighting in their branches around the country to more efficient LED lighting. The challenge was finding the right products and solutions that would meet their energy reduction initiatives while also meeting their design standards.

SOLUTION

FSG was able to identify products and solutions that would work for TD Bank. Furthermore, FSG was able to build and execute a nationwide project through the FSG National Accounts Solutions team that would get those lighting products installed and operational for TD Bank.

RESULT

To date, FSG has successfully retrofitted multiple TD Bank branch locations. The project is delivering the energy savings and lighting levels expected by TD Bank. TD Bank has explored other project opportunities with FSG including signage retrofits and refacing using FSG's signs team.
