

LITTLE ELM ISD

Little Elm Texas

Little Elm ISD wanted to take advantage of the cost and energy reductions associated with LED lighting. As a Buyboard contractor, FSG was able to help Little Elm ISD bring their lighting retrofit projects to life.

Owner

Little Elm ISD

Contract Type

Lighting

Contract Amount

\$72,400

Electrical Contractor

FSG

Energy Savings

\$69,943.50 (Over 10 Years)

Annual kWh Reduction

39,783

Buyboard Contractor

As a Buyboard contractor, FSG was able to save Little Elm ISD time and money by executing the project without Little Elm having to send the project out to bid.

CHALLENGE

School districts have a fiduciary responsibility to their taxpayers, their employees, and, most importantly, their students. While implementing projects to reduce operational costs are necessary and good, sometimes the process to get these projects going can be costly in and of itself. When Little Elm ISD decided to look for ways to become more efficient, they needed a partner that could not only bring the right products and services to the table, but that could also make the process smooth and efficient.

SOLUTION

FSG was able to bring a turnkey lighting retrofit project to Little Elm ISD that was specifically tailored to meet their financial goals and long term sustainability initiatives. Leveraging their common Buyboard relationship, Little Elm ISD and FSG were able to execute a contract and complete a lighting retrofit project, thus allowing the saved operational dollars to be redirected back into the classroom more quickly.

RESULT

In the end, Little Elm ISD realized the operational savings that were outlined in the proposal prepared by FSG. FSG continues to work with Little Elm to identify other energy savings opportunities that can help redirect more funds into the classroom and, ultimately, into our future!
