

Multi-Site HVAC Controls Made Easy

Command, control and monitor HVAC systems in real-time through an easy-to-use software interface. Remotely manage setpoints, schedules, preventative maintenance programs and more.

Multi-site HVAC command, control and visibility without compromise.

- ✓ Global setpoints
- ✓ Energy savings
- ✓ Predictive maintenance
- ✓ Custom notifications
- ✓ Global schedules
- ✓ Occupant comfort
- ✓ Real-time alerts
- ✓ And more

Global Setpoints & Schedules

Change setpoints and manage operating schedules across your entire building portfolio with the Chariot platform.

Custom Alerts & Notifications

Customize your HVAC alerts and trend data to identify critical system issues and perform predictive maintenance.

Seamless Integration

FSG is equipped to handle all HVAC systems, including RTUS, split systems and built-up systems with boilers & chillers.

24/7 HVAC Monitoring & Support

FSG's team of experts is equipped to help you triage alarms, troubleshoot mechanical issues & dispatch HVAC techs as needed.

Smart Thermostat Solution

HVAC automation simplified. The Smart Thermostat Solution allows you to remotely control thermostat setpoints and schedules across your building portfolio by installing low-cost, easy-to-install thermostats at your locations.

About the Solution

Simplified controls to get you started. The Smart Thermostat Solution from FSG Smart Buildings gives users the ability to control thermostat setpoints & schedules across entire building portfolios through the Chariot platform. Select the smart thermostat of your choice & FSG will install & commission your solution to get you all of the following:

- Global setpoints and schedules
- Easily scalable for entire portfolios
- Easy installation
- Local and remote control
- Works with wired & wireless thermostats
- And more

Compatible Brands

FSG Smart Buildings works with a variety of wired and wireless smart thermostat manufacturers, including but not limited to:

Industry Applications

The Smart Thermostat Solution is recommended for small to medium footprint commercial buildings looking for simplistic HVAC control.

- Restaurants
- Banks
- Convenience stores
- Retail
- Office spaces
- And more

Native Integration Solution

The Native Integration Solutions allows you to directly integrate HVAC systems with your building automation system. Tap into hundreds of points of data for expanded system visibility and remote control of setpoints and schedules.

About the Solution

Advanced troubleshooting for HVAC and building experts. By talking directly with the on-board computer at the HVAC unit, the Native Integration Solution taps into hundreds of points of data - such as supply/return air, fan monitoring, outdoor air damper controls, humidity sensors and more - for expanded system visibility and troubleshooting.

- Global setpoints and schedules
- Hundreds of HVAC data points
- Advanced troubleshooting and analytics
- Remote control from the Chariot platform
- Direct integration via wired connection
- And more

Compatible Brands

FSG Smart Buildings works with most popular brands of HVAC units found in commercial buildings, including but not limited to:

Industry Applications

The Native Integration Solution is recommended for larger, built-up systems and for users looking to run advanced troubleshooting and predictive maintenance programs. Native integration can work in any commercial building as long as the HVAC systems themselves are smart.

BUILT ON

A Smart Platform for Smart Buildings

Designed with multi-site energy management and building automation systems in mind, Chariot is the cloud-based software platform for real-time control, monitoring and analysis of building systems.

Multi-Site Command, Control and Monitoring

Command, control and monitor your building environments in real-time to help reduce energy, operational and maintenance spend.

- Lighting on/off control
- IoT sensors
- Signage monitoring
- Custom site grouping
- Global map view
- Refrigeration monitoring
- Dimming control
- Energy meters
- Floorplan view
- Custom energy dashboard
- Schedules for lighting/HVAC
- Global HVAC setpoint adjustments

Asset Management

Keep track of your critical assets and know when to act. Chariot gives you a secure, cloud-based repository for all equipment, warranty and service data.

- Manufacturer Information
- Installation Dates
- Warranty Tracking
- Service Tracking
- Maintenance Schedules
- Lease tracking
- QR codes
- Serial Numbers
- Vendor information
- Service tracking
- Serial numbers
- Inspection dates
- Insurance coverage

Custom Alerts and Data Analysis

With Chariot's built-in rule engine, never be left in the dark again. Create your own notifications and utilize multiple data visualizations for remote diagnostics and preventative maintenance.

- Rule engine for building custom alerts
- Data visualization
- Plot multiple data points
- Custom Alarms
- Export all reports
- Custom escalation paths
- Unlimited data retention
- Alerts via in-app, email or text
- Preventative maintenance
- Remote diagnostics and fault detection
