

National Electrical and Automation Installation Services

FSG's nationwide network of electricians and building automation experts help countless businesses with fast installations of hundreds to thousands of locations with minimal disruption to operations.

As one of the nation's largest providers of electrical services, FSG is here to help you with your projects.

- ✓ Electrical construction
- ✓ Electrical services
- ✓ Lighting control systems
- ✓ Smart metering projects
- ✓ Energy management systems
- ✓ Building automation systems
- ✓ Signage services
- ✓ And more

1000+ In-House Electricians

You're in good hands. FSG has over 1,000 electricians on staff with access to trucks & manpower in more than 30 major US cities.

900+ National Install Partners

In areas where FSG lacks a dedicated footprint, we fill in the gaps with an installation partner network of over 900.

Smart Building Experts

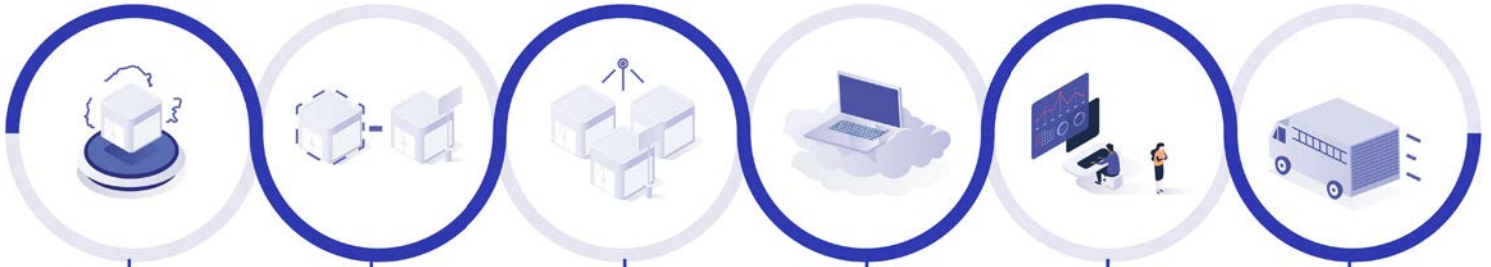

FSG Smart Buildings specializes in providing installation services for EMS/BAS, lighting controls and smart metering projects.

Minimal Disruptions

FSG is committed to ensuring our installations are completed with minimal disruption to business operating hours.

The FSG Smart Buildings Difference

Discovery

Hypothesis-driven approach to protocols, devices, APIs and integrations to create the optimal solution.

Pilot Projects

Validate our Chariot Labs solution in a real-world configuration at one of your locations.

National Installs

Fast installation of hundreds to thousands of locations with minimal disruption to your business operations.

Chariot Platform

One enterprise console to manage and monitor your entire portfolio from any desktop, tablet or smartphone.

Monitor/Maintain

Prevent truck rolls by remotely troubleshooting & de-escalating issues with HVAC techs, engineers & automation SMEs.

24/7 Support

Dispatch trucks as needed during peak and non-peak hours to reduce maintenance spend.

Our Installation Specialties

Electrical Construction & Service

FSG is able to roll trucks and teams to every corner of the country and is able to help you find solutions to your company's biggest electrical challenges, no matter what zip code you're in.

Building Automation Systems

Whether internal or contracted personnel, our building automation technicians are versed in system design and deployment from real-world, hands-on experience with a variety of system types.

Lighting Controls Systems

The FSG Smart Buildings has lighting controls experts and installers on hand to help design, install and commission a variety of lighting controls solutions.

Smart Metering

Our technicians have an understanding of the differences in metering devices and technology to help design the most appropriate solution for you.

Commercial Signage

FSG can design, fabricate and install signs complete with smart metering for real-time alerts of any power loss or maintenance issues.
