

Upgrade Your Existing OSRAM ENCELIUM® Lighting Controls

As close to factory-direct as possible. With FSG Smart Buildings, we will assess, design, install, commission and project manage your OSRAM ENCELIUM lighting controls upgrades.

“FSG is the logical primary choice for an upgrade program like this based on its strengths as an organization, including its national footprint of electrician and installers, its turnkey solutions and its ability to work with leading lighting manufacturers. OSRAM is very pleased to begin our partnership with FSG, and we look forward to bringing new networked light management and IoT solutions to market that customers want.”

Yavor Kolarov
VP of Sales, OSRAM Digital Systems

Benefits of the Program

Turnkey design, procurement, installation, commissioning and project management by single-source provider

Rebates and financing available to ensure best value for you

Access to the ENCELIUM® Light Management System product line

Access to LED IoT-enabled fixtures from range of trusted manufacturers

Why Choose FSG Smart Buildings?

When it comes to selecting a lighting and controls advisor, it is important to know that you are covered from start to finish. FSG Smart Buildings is a national leader in lighting and controls committed to ensuring your upgrade is handled to your exact specifications.

Audit & Design

FSG will audit your facilities and design a custom solution to meet your needs.

Fixture Upgrades

FSG will upgrade any existing lighting fixtures to your exact specifications.

Encelium Sensor Integration

FSG will integrate all your Encelium sensors to ensure your system works perfectly.

Installation & Programming

FSG's national footprint of electricians will install and program your lighting system.

Customer Training

FSG offers customer training so you know how to operate your lighting system.

When your ENCELIUM® EXTEND upgrade is complete, you will have a modern system equipped with the Internet of Things (IoT), giving you advanced strategies like space utilization, enhanced safety and security, operational efficiency, maximized energy savings, and a smart building environment.

Should I Upgrade My Lighting and Controls?

Lighting control technology continues to evolve at a rapid pace. If any of the following situations apply to you, FSG Smart Buildings is ready and able to assist you with your upgrade.

- ✓ You have the ENCELIUM GreenBus I® lighting management system (2001-2012) that has reached its end of life.
- ✓ Your wallstation keypad no longer works to control dimming and lighting.

About ENCELIUM® EXTEND

Optimize energy savings, streamline operations and improve occupant comfort. The ENCELIUM EXTEND System is a powerful way to monitor and maintain buildings to fit them for the future of lighting.
