

# Monitor Your Signs in Real-Time

Your brand sign is the first thing your customers see. At FSG, not only do we design, build, and install signs, but we allow you to remotely monitor your signs anytime, anywhere.

## Benefits of Sign Monitoring

Protect your brand image and ensure your signs are always bright and inviting.

Be notified of any maintenance issues in real-time via email, text or phone call.

Keep track of your energy usage for measurement and verification.

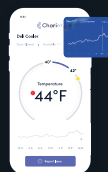

Work with FSG's team of experts to dispatch technicians as soon as possible to minimize sign downtime.

## How to Get Started

**1** FSG will design, fabricate and install your sign complete with monitoring capabilities.

**2** Remotely monitor your signage with the Chariot platform, brought to you by FSG Smart Buildings.

**3** Dispatch technicians as needed to resolve critical sign maintenance issues.

BUILT ON

# A Smart Platform for Smart Buildings

Designed with multi-site energy management and building automation systems in mind, Chariot is the cloud-based software platform for real-time control, monitoring and analysis of building systems.

## Multi-Site Command, Control and Monitoring

Command, control and monitor your building environments in real-time to help reduce energy, operational and maintenance spend.

- Lighting on/off control
- Dimming control
- IoT sensors
- Energy meters
- Signage monitoring
- Floorplan view
- Custom site grouping
- Custom energy dashboard
- Global map view
- Schedules for lighting/HVAC
- Refrigeration monitoring
- Global HVAC setpoint adjustments

## Asset Management

Keep track of your critical assets and know when to act. Chariot gives you a secure, cloud-based repository for all equipment, warranty and service data.

- Manufacturer information
- Serial numbers
- Installation dates
- Lease tracking
- Warranty tracking
- Vendor information
- Service tracking
- Inspection dates
- Maintenance schedules
- Insurance coverage
- QR codes

## Custom Alerts and Data Analysis

With Chariot's built-in rule engine, never be left in the dark again. Create your own notifications and utilize multiple data visualizations for remote diagnostics and preventative maintenance.

- Rule engine for building custom alerts
- Custom escalation paths
- Data visualization
- Unlimited data retention
- Plot multiple data points
- Alerts via in-app, email or text
- Custom Alarms
- Preventative maintenance
- Export all reports
- Remote diagnostics and fault detection
