

Drill into Energy Usage and Equipment Health with Smart Metering

Monitor and verify your energy usage anytime, anywhere with the Chariot platform. Know when your critical equipment is being turned on/off or operating in unexpected ways in real-time.

About the Solution

With the Smart Metering Solution from FSG Smart Buildings, meter all your critical equipment and control your energy spend. Whether you need to meter your lighting, HVAC, electrical mains or anything else, FSG is here to design and deploy a smart metering solution custom-tailored to your buildings. See and act on your meter data anytime in the Chariot platform and work with FSG to dispatch electricians as needed to repair any system issues.

Visibility Like Never Before

View and analyze all your meter data from the Chariot platform.

Real-Time Notifications

Be notified of maintenance or power loss issues in real-time via email, text or phone.

Measurement & Verification

Keep track of your energy usage for measurement and verification.

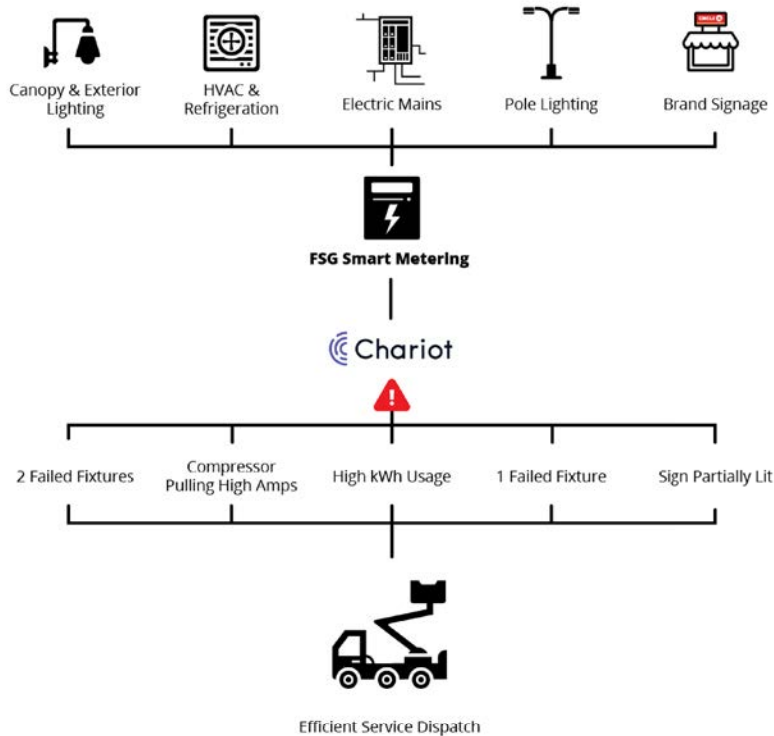

24/7 Monitoring & Service

FSG will actively monitor your smart meters and dispatch electricians if needed.

How It Works

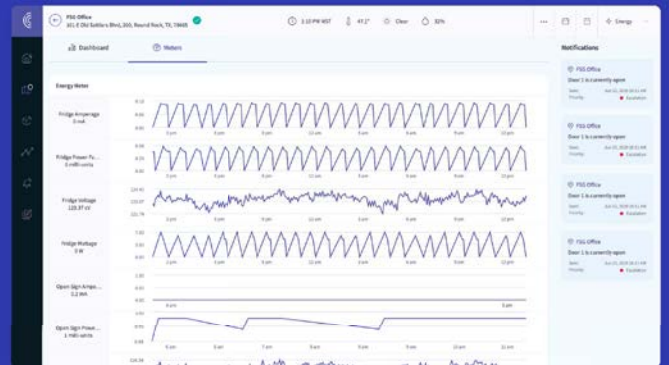

FSG Smart Buildings will design your solution, procure industry-leading hardware and provide a full turnkey delivery process. If you have existing smart meters in place, FSG can tie them into Chariot for all the same features and functionality. Once your system is up and running, FSG will help monitor and troubleshoot your systems as well as dispatch electricians as needed for repairs.

A Smart Platform for Smart Metering

Designed with multi-site businesses in mind, the Chariot platform allows you to monitor your smart metering in real-time. Be instantly notified of any power outage issues via email, text or phone. Trend meter data to identify any abnormalities or energy offenders.

In addition, utilize a custom energy dashboard to identify your best and worst performing locations and compare to historical data.
