

FSG brought a complete energy management solution to a local congregation to help enrich the comfort and safety of the facility while lowering operational spending.

Owner
First Baptist Belton

Contractor
Facility Solutions Group

Contract
\$29,000

Contract Type
Energy Controls

Locations
Belton, Texas

CHALLENGE

Nathan Parr, Operations Manager with First Baptist Belton, needed a solution to manage the mechanical systems located throughout the First Baptist campus. With chiller controls for the worship center already in place, he desired to integrate to these controls and add thermostats in specified locations across the facility, all communicating back on one centralized dashboard.

SOLUTION

Serving as master integrators, FSG Energy was able to integrate the chiller controls in the worship center, and install wireless thermostats where specified. The information was served up on one centralized dashboard, thus allowing Mr. Parr to manage all HVAC equipment in one place. Also, integrating the chiller controls drastically reduced installation costs as new controls for the worship center were deemed unnecessary.
