

Over the course of several years and multiple projects, FSG has worked to bring more sustainable comfort and safety solution to the Port Authority of New York and New Jersey.

**Owner**  
Port Authority of NY and NJ

**Contractor**  
Facility Solutions Group

**Contract**  
\$18,000,000

**Contract Type**  
Lighting Retrofit

**Location**  
New York, New York

## CHALLENGE

Facility Solutions Group partnered with D&B Engineering to undertake a series of projects for the Port Authority of New York and New Jersey. The Port Authority is joint venture between the states of New York and New Jersey, and operates much of the area transportation infrastructure. The scope of this project was truly massive, both in number of sites and lighting fixtures and electrical equipment slated for upgrade.

## SOLUTION

Sites for this job included Newark Liberty International Airport, Port Authority Bus Terminal, George Washington Bridge, and the Holland Tunnel. More than 8,800 tons of chillers were installed at Newark Airport, along with high-efficiency lighting throughout Terminal B, all parking garages, monorail stations, and administrative buildings. Over 12,000 LED fixtures were installed on the GWB, Outer Bridge, Goethels Bridge, and in both the Holland and Lincoln tunnels.
