Turnkey Solutions

At FSG, we design turnkey solutions for any - or every - stage of your project, from inception to final sign-off. As a single-source provider, our solutions offer not only excellent up-front pricing and outstanding customer service but also lower the total cost of ownership through the use of sustainable technologies and practices.

Lighting Design

Our design services are performed by teams of knowledgeable engineers and design staff. With years of industry experience in their respective disciplines, our teams are intimately familiar with the best products and solutions available today, and will build a tailor-made system that will bring the most value to your business or project.

Electrical Construction Design & Specification

Electrical solutions that streamline and reduce your overall energy consumption, and provide you with exceptional vision into, and control over, your systems. CAD and virtual modeling make sure your electrical design works with other trades and the overall design of the facility being worked on.

Signage Design

Custom-made signage that establishes your brand, informs your customers, and can suit any size project, from a new start-up's first building to an 80,000-seat stadium.

Technology & A/V Design

Audio/visual and technology installations performed by licensed, knowledgeable technicians provide everything from cabling set-up, to data center design and install, to security system surveillance.
