MD ANDERSON CANCER CENTER WEST HOUSTON

Houston, Texas

Electrical Construction

Contract Type

Healthcare

Contract Amount

\$10,833,000

General Contractor

Linbeck

Electrical Contractor

FSG

Engineering Firm

Shah Smith

Architect

HDR

CHALLENGE

FSG understands that getting the project designed correctly, in the beginning, helps ensure that the project gets built the right way in the end. Safety, efficiency, and professionalism are just a few things to expect from us. We bring our safety record, innovative solutions, and well-trained teams to every project. Our experience and knowledge gained over the course of many years have allowed us to learn the best practices and then repeat those practices time and time again.

SOLUTION

MD Anderson has a new 175,000 square foot outpatient diagnostic and treatment center under construction in Central Park, near the Energy Corridor in West Houston. MDACC will merge three of its West Houston operations which includes clinical offices, laboratory/imaging services, and supportive care. The new facility will be MD Anderson's first free-standing building constructed outside of Houston's Texas Medical Center. The new center represents the first phase of a long term plan by MDACC to develop facilities on its 34.5-acre campus in Central Park. Completion is scheduled for the end of 2018.
