About the Project

"It's time for us to take on the largest project we've ever undertaken." Gay Nord, CEO Methodist Hospital

METHODIST HOSPITALS HCA

San Antonio, Texas

Project included two new patient towers, expansion of adult and children's emergency departments, neonatal ICU expansion and parking garage addition.

CHALLENGE

Methodist Hospital announced its largest construction project in its history, which will expand the footprint of the Methodist Hospital campus by 445,000 square feet. The project includes renovations and expansions for Methodist Hospital and Methodist Children's Hospital, a campus of Methodist Hospital. Construction begins in 2014 and will continue through 2017. Projects like this one demand the highest level of skill and professionalism on the part of the participating contractor partners.

SOLUTION

FSG Electric was with this project at every phase. Our competent staff of electricians, and management team brought an elevated level of experience and capabilities that helped make this demanding project a success.

RESULT

In the end, the project has been so successful, that the project was expanded and FSG works today on a seven story children's tower with its own power plant; an expansion of the adult and children's emergency rooms; an expanded central tower for Women's Health Care and critical care services; expanding the Neonatal ICU to 94 beds and a 13-story garage with three levels below grade.
