Architectural Designer

Job Scope

As an Architectural Designer, you will creatively transform concepts into tangible and aesthetically pleasing architectural designs. Join our team to play a pivotal role in the architectural process, collaborating with multidisciplinary teams to create innovative and functional spaces. This position is ideal for a detail-oriented and imaginative individual with a passion for design and a commitment to bringing architectural visions to life.

Responsibilities

- Work closely with clients and project stakeholders to understand design requirements and project goals.
  Generate creative and innovative design concepts that align with client needs and project objectives.
  Develop detailed architectural drawings, 3D models, and renderings to illustrate design concepts.
  Collaborate with the project team to refine and enhance design ideas based on feedback and practical considerations.
  Stay informed about local building codes, zoning regulations, and industry standards.
  Ensure that designs comply with relevant codes and regulations.
  Research and select appropriate materials, finishes, and furnishings for architectural projects.
  Consider sustainability and environmental impact in material choices.
  Collaborate with architects, engineers, and other professionals to integrate various project components into cohesive designs.
  Coordinate with consultants and specialists to incorporate specialized elements into designs.
  Prepare and present design proposals to clients, project stakeholders, and regulatory authorities.
  Communicate design ideas effectively through drawings, models, and presentations.
  Develop comprehensive construction documents, including detailed drawings and specifications.
  Work closely with the project team to ensure accuracy and clarity in documentation.
  Support project management activities, including budgeting, scheduling, and monitoring project progress.
  Collaborate with project managers to address design-related challenges during construction.
  Stay abreast of industry trends, new technologies, and advancements in architectural design.
  Attend relevant workshops, conferences, and training to enhance skills and knowledge.

Requirements

- Bachelor's or Master's degree in Architecture or a related field.
  Previous experience in architectural design, with a portfolio showcasing design projects.

Proficiency in architectural design software and tools (AutoCAD, Revit, SketchUp, Adobe Creative Suite, etc.).

Strong design and visualization skills.

Excellent communication and presentation abilities.

Knowledge of sustainable design principles.

Strong attention to detail in both design and documentation.
