

Commissioning Agent

Job Scope

Commissioning Agents are involved with reviewing information about completed installations of a BAS system or other projects and verifying that what has been installed and configured matches what was sold to the customer and meets quality standards. You will also work with other teams and departments to continue to grow and template the Remote Commissioning process documentation to deploy quicker and more accurately. Remote Commissioning Agents collect data about instances of product errors and investigate possible solutions by troubleshooting the manufacturing or design process.

Requirements

- One year in a commissioning role or related experience is required.
Excellent verbal and written communication skills.
Excellent organizational skills and attention to detail,
Extensive knowledge of or the ability to quickly learn the organization's products and production processes.
Excellent interpersonal skills with the ability to liaise with developers, project managers, and customer support.
Strong analytical and problem-solving skills.
Proficient with Microsoft Office Suite or related software.
Experience with Linux and Windows.
