

DAS Project Manager

Job Scope

As a DAS Project Manager, you will be vital in leading project teams and working closely with the Technology department to execute projects related to our cutting-edge product. The ideal candidate should possess high self-motivation and enthusiasm for their work, be results-driven, and have a clear vision for their career growth. You will be responsible for the detailed planning, execution, and monitoring of these complex projects, ensuring that projects are completed on time and within scope and budget. Effective communication, collaboration, and teamwork with other departments and stakeholders will be crucial to the project's success.

Responsibilities

- Install DAS wireless infrastructure and equipment to NEC standard at customer job sites using any combination of external and internal antennas, coaxial cable, fiber optic cable, and other appropriate components.
Terminate wall and ceiling-mounted components.
Complete Sweep, Signal Generation/Spectrum Analysis, PIM, and Fiber testing.
Assist in proposal development and project preparation activities
Complete site surveys to troubleshoot low signal issues on installations
Complete job-related documentation and record-keeping
Assist in warehouse maintenance and inventory
Keep customer and company informed of the progress of the installation.
Communicate and coordinate with customers and companies about specific safety, local code, and company installation requirements.
Assist with the development of project schedules and materials/subcontractor selections.
Mentor and lead all DAS technician crews.

Requirements

- Four-year Technical or Business Degree
BICSI Certification
PMP Certification or in-process
Minimum two years experience in Project Management
MUST be able to pass a Drug and Background screen
Valid driver's license
Ability to multitask while staying organized
Strong verbal and written communication skills
Positive customer service skills
