

Structured Cabling Technician

Job Scope

As a Structured Cabling Technician, you will be responsible for installing, maintaining and repairing cable infrastructure in a low-voltage environment. The ideal candidate will be able to meet the physical demands of the work site as well as provide excellent customer service. We are looking for career-minded candidates who are willing to learn and grow with the company.

Responsibilities

- Perform major and minor preventive maintenance and repairs by troubleshooting cabling system issues
 - Identify, track, and remove abandoned cables
 - Test every newly installed or relocated cable in accordance with established procedures
 - Keep cable neatly tied and bundled while maintaining safety standards
 - Develop in-depth knowledge of National Building Codes and standards
 - Record time and materials used
 - Assist other members of the team with installation and maintenance
 - Be able to work in various environments including outdoors in varying degrees of weather working at heights, and in small confined spaces.
 - Operate hand tools, power tools, ladders, and test equipment

Requirements

- High School Diploma or equivalent
 - One-year experience
 - Valid Driver's License
 - Must be able to pass drug and background screen
 - BICIS preferred
 - Manufacturer training preferred
 - OSHA preferred
